Primary Reserve Ratio		Driver verse verse verticals as we and also wet assets divided by
Trimary rieserve riado		Primary reserve ratio is expendable net assets divided by
		total expenses. This ratio indicates the amount of time
		during which an institution could pay its expenses or
		function using reserves.
Net Operating		Net operating revenue ratio is the change in unrestricted
Revenue Ratio		operating net assets divided by total unrestricted revenues.
		It indicates the institution's financial performance as a
		result of the year's activity. It indicates if a college is
		covering its annual operating expenses or is dipping into
		its reserves.
Return on Net		Calculated by taking the change (plus or minus) in Total
Assets Ratio		Net Assets from the beginning of the FY year. Divide that
		by the value of the Total Net Assets at the beginning of the

fiscal year. The ratio furnishes a broad measure of the change in an institution's total wealth over a single year and is based on the level and change in total net assets. Thus, the ratio provides the most comprehensive measure of the growth or decline in total wealth of an institution over

a specific period of time.

Viability Ratio		Calculated by taking expendable net assets divided by long-term debt. This ratio measures one of the most basic determinants of clear financial health: the availability of expendable net assets to cover debt should the institution need to settle its obligations as of the balance sheet date.	
Composite Financial Indicator		This indicator was developed in Strategic Financial Analysis for Higher Education: Identifying, Measuring & Reporting Financial Risks (Seventh Edition), by KPMG LLP; Prager, Sealy & Co., LLC; Attain LLC.
